PHASE I ENVIRONMENTAL SITE ASSESSMENT

5333 W. 25th Street
Cicero, Illinois 60804
Cook County

Prepared for:

Town of Cicero
4949 West Cermak Road
Cicero, Illinois 60804

June 1, 2010

EXECUTIVE SUMMARY

K-Plus Engineering, LLC has completed a Phase I Environmental Site Assessment (ESA) of the industrial property that is located at 5333 W. 25th Street in Cicero, Illinois. The Subject Property is approximately 0.22 acres in size and is currently developed with a one-story building finished with a few offices, retail space, and manufacturing/production space. The property was most recently occupied by a lamp assembly business. Based on the findings and observations made during this ESA, K-Plus identified the following Recognized Environmental Conditions (RECs).

- The Subject Property has utilized Underground Storage Tanks based on Sanborn maps, OSFM reports and verbal history. As many as six USTs may be present at the property which may have stored solvents and/or fuel oil.
- The Subject Property has been utilized for industrial purposes since its development including its prior use for “tire vulcanizing” and “laundry”.

Further investigation of the Subject Property would be necessary in order to determine what, if any, impact the current and historic industrial operations have had on the subsurface of the Subject Property.

1.0 INTRODUCTION

K-Plus Environmental LLC (K-Plus) was retained by the Town of Cicero (Client) to conduct a Phase I Environmental Site Assessment (ESA) of the industrial property located at 5333 W. 25th Street in Cicero, Illinois (Subject Property).

1.1 Purpose

This Phase I ESA was completed in order to provide an objective, independent, professional opinion of the possible presence of Recognized Environmental Conditions (RECs) or other possible environmental concerns (if any) associated with the Subject Property as part of environmental due diligence.

As defined in ASTM E 1527-05, the term *Recognized Environmental Condition* means "...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property." In addition, the term *Historical Recognized Environmental Condition* means "... an environmental condition which in the past would have been an REC, but which may or may not be considered a REC currently." Performance of the Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the existence of Recognized Environmental Conditions in connection with the Subject Property.

The objective of this assessment is to perform a due-diligence and all appropriate inquiry regarding the environmental condition of, and assess potential liability for any contamination on the site in order to satisfy Landowner Liability Protections (LLPs) requirements.

1.2 Scope of Services

The Phase I ESA was conducted in general conformance with the ASTM Designation: E 1527-05, *Standard Practice for Environmental Site Assessments Process*.

The scope of work for this Phase I ESA was structured to offer a phased, systematic approach to evaluating site conditions. It included inquiry by and/or under the direct supervision of an Environmental Professional (as defined in ASTM Standard Practice E1527-05) and it included the following tasks consistent with the AAI Rule, the revised ASTM Standard, and Illinois Phase I requirements:

- A review of reasonably ascertainable and practically reviewable standard and supplemental record sources associated with the Subject Property and adjoining properties including, but not limited to: historical resources (e.g. aerial photographs, topographic maps, fire insurance maps, geographical and geological maps, and city directories), environmental databases (i.e. lists of known sites of contamination and regulated facilities), governmental records (e.g. Federal and State files, building department records, and local fire department records) and prior environmental and geotechnical reports (if provided):

- An inspection of the Subject Property and any improvements as well as visual observations of adjacent properties, and other sites and/or facilities in the vicinity of the Subject Property.
- Formal interviews with present and past (if any) owners, operators, and occupants of the Subject Property (as identified by the Client and/or record sources) and local government officials; and
- Evaluation of the information gathered and preparation of a written report that includes all supporting documentation and details all findings, conclusions, opinions, and any recommendations.

Additionally, as is deemed pertinent, the scope of work was expanded to include potential environmental concerns, such as the existence of asbestos-containing materials that are not required pursuant to the ASTM standards.

1.3 Significant Assumptions

No significant assumptions were made during the course of this Phase I ESA.

1.4 Limitations and Exceptions

K-Plus Environmental performed the Phase I ESA using the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental consultants practicing in this or other localities. No other warranty is expressed or implied. Information presented in the Phase I ESA is deemed reliable; however, there cannot be a guarantee that all potential environmental conditions have been located or identified. The conditions observed and evaluated during the site inspection are representative of the date(s) stated. Materials and conditions that are concealed or are inaccessible may not be discovered.

The lack of visible evidence of potential USTs and/or the fact that individual and agencies identified in this report may not be aware of, or do not have records of the current presence of USTs does not preclude the possibility that USTs could be present at the Subject Property. Visible evidence of USTs, such as fill ports or vent pipes may have been obscured from view, and USTs could have been used at the Subject Property without the knowledge of the current owner/operator, site contact, or government agencies.

The findings, conclusions, and opinions expressed herein are based on reasonably ascertainable and practically reviewable information disclosed through interviews and publicly available records at the time of the Phase I ESA. The statements contained herein, on which our observations, opinions, and conclusions were based, are deemed factual. The reported analyses, opinions, observations, and conclusions are unbiased, professional, and limited only by the reported assumptions, qualifications, and conditions stated herein. All information in this report is from sources deemed to be reliable; however, no representation or warranty is made as to the accuracy thereof. K-Plus cannot be responsible for the quality and content of information obtained from the external sources consulted or for conditions that are concealed, not fully disclosed, or not available at the time of the Phase I ESA.

1.5 Special Terms and Conditions

The Phase I ESA was completed in accordance with terms and conditions as designed by the Client.

1.6 User Reliance

This assessment has been performed in conformance with all applicable legal requirements and accepted practices prevailing in the environmental assessment and asbestos consulting industries, including the U.S. Environmental Protection Agency's final "All Appropriate Inquiry" Rule (70 Fed. Reg. 66070) ("AAI Rule"), the 2005 update of the American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessments (E 1527-05) and the requirements of 415 ILCS 22.2(j)(6)(E), the "Illinois Phase I". The standard of care employed during this investigation should be sufficient to meet the definition of an "innocent landowner" under current environmental laws. If this Phase I ESA report is more than 180 days old, certain sections must be updated in order to maintain qualification for LLPs afforded under CERCLA.

The K-Plus Environmental professional who prepared this assessment meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and they have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property.

K-Plus Environmental, its officers, and its employees have no present or contemplated interest in the property or the parties involved. Our employment and compensation for preparing this report are not contingent upon any action or event resulting from the analyses, opinions, observations, or conclusions, in or from the use of this report.

This report is confidential and has been prepared specifically for the use by our Client. No third party may use the information in this report without obtaining the permission of both K-Plus and the clients, for whom this report was prepared. In no event may this report be used in whole or in part in any public offering or security without the prior written consent of K-Plus. No abridgment, abstracting, or excerpting of this report may be made for any purpose whatsoever without obtaining the permission of K-Plus.

More information regarding the methods used by K-Plus Environmental in creating this Environmental Assessment can be found in Appendix 1- Phase I Environmental Site Assessment Contents.

2.0 SUBJECT PROPERTY

The site reconnaissance was conducted on Monday, May 24, 2009 by Ms. Jessica Madsen, Environmental Professional for K-Plus. Ms. Madsen was accompanied by Mr. Ray Azzolin, owner, during the site inspection. The weather conditions at the time of the visit were sunny with an approximate temperature of 80° F. As a tool in preparing this report and documenting the conditions encountered at the property, various photographs of the Subject Property, surrounding land use, and other relevant features were taken. Copies of all other supporting documents that were relied upon during this project have been included as appendices in this report.

2.1 Site Location

The Subject Property is located on the south side of West 25th Street between 53rd Avenue and 54th Avenue. Specifically, the property is located at 5333 W. 25th Street in Cicero, Cook County, Illinois (Figure 1).

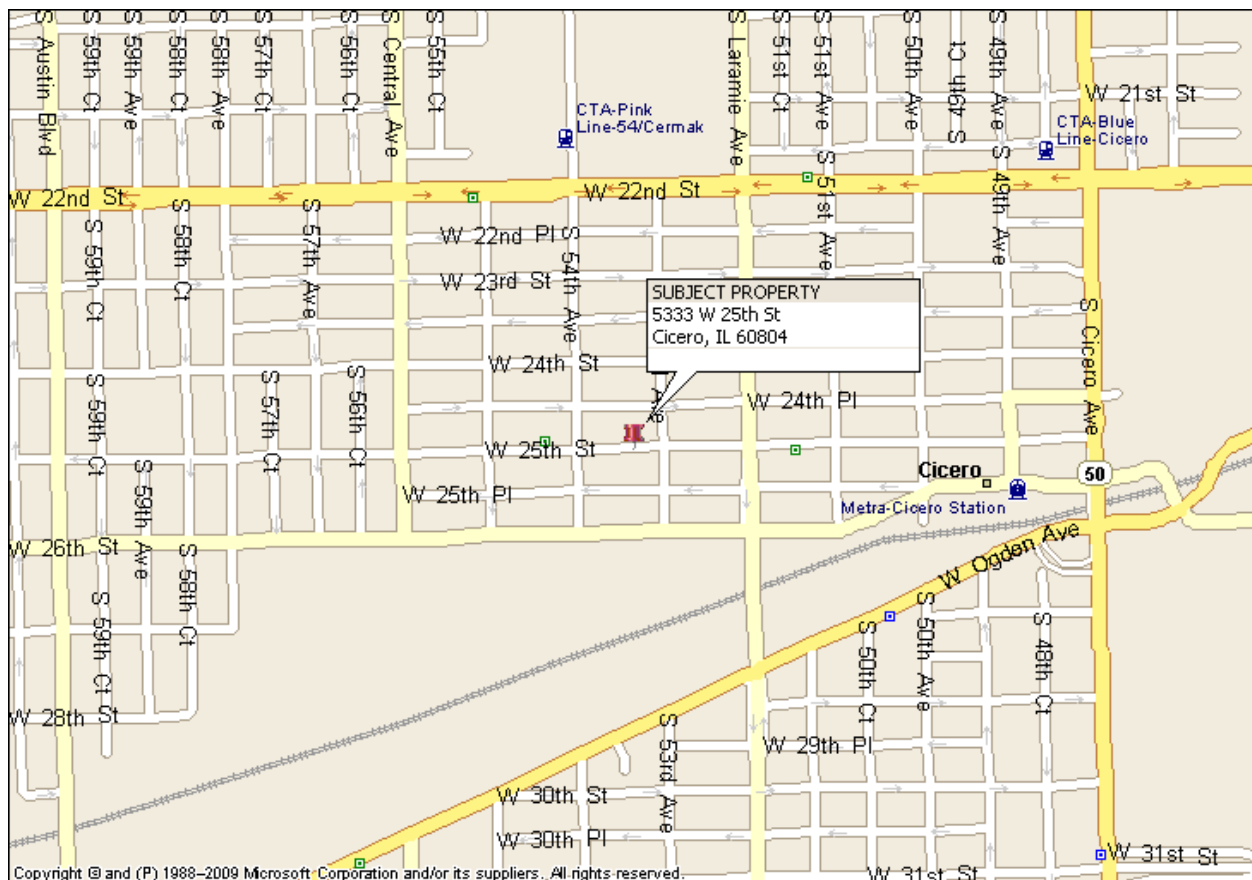

Figure 1 – Site Location Map

2.2 Pin & Legal Description

The Subject Property is assigned PIN numbers: 16-28-126-006-0000 and 16-28-126-007-0000. No legal description was provided for this Subject Property.

2.3 Site Features

The Subject Property measures approximately 9,400 square feet (ft²) and is currently developed with a one-story retail/commercial building. The building on the Subject Property was noted as constructed of concrete masonry on a concrete slab foundation. The building encompasses the entire lot of the Subject Property a concrete sidewalk is noted to the north and the public alley is to the south.

The northern front of the building was partially finished as office and retail space. The front area was noted as finished with the following: floors were finished with 9" and 12" vinyl floor tiles, with area rugs in high traffic areas; the interior walls were painted drywall and wood paneling; the ceilings were finished with plaster or tile; and fluorescent lighting was noted used throughout the office areas.

The southern rear of the building was noted as largely unfinished, with exposed/painted concrete floors, unfinished walls, and a painted exposed ceiling.

The Subject Property uses natural gas supplied by People's Gas for the Subject Property's heating system. Commonwealth Edison provides electricity to the building. According to the site contact, the building is connected to the Town of Cicero (via City of Chicago) water and sewer systems.

2.4 Surrounding Area

The Subject Property is located in a mixed use area. Specifically, the Subject Property is bounded on the **north** by West 25th Street, followed by a parking lot and commercial building; on the **south** by a public alley, followed by residential properties; on the **east** by two residential properties; and on the **west** by a vacant retail/commercial building, followed by similar properties (Figure 2).

Figure 2 – Site and Surrounding Area (aerial from October, 2007)

2.5 Topography

In general, the topography of the Subject Property is relatively flat, with no discernible elevation changes. According to the United States Geological Survey 7.5 Minute Series Topographic Map of Berwyn, Illinois Quadrangle (1998), the Subject Property lies at a relative surface elevation of approximately 606 feet above mean sea level. The nearest surface water body is South Branch of the Chicago River which is located within 2½ of a mile south of the Subject Property. Regional groundwater flow in the area is expected to flow in a southerly direction (Figure 3).

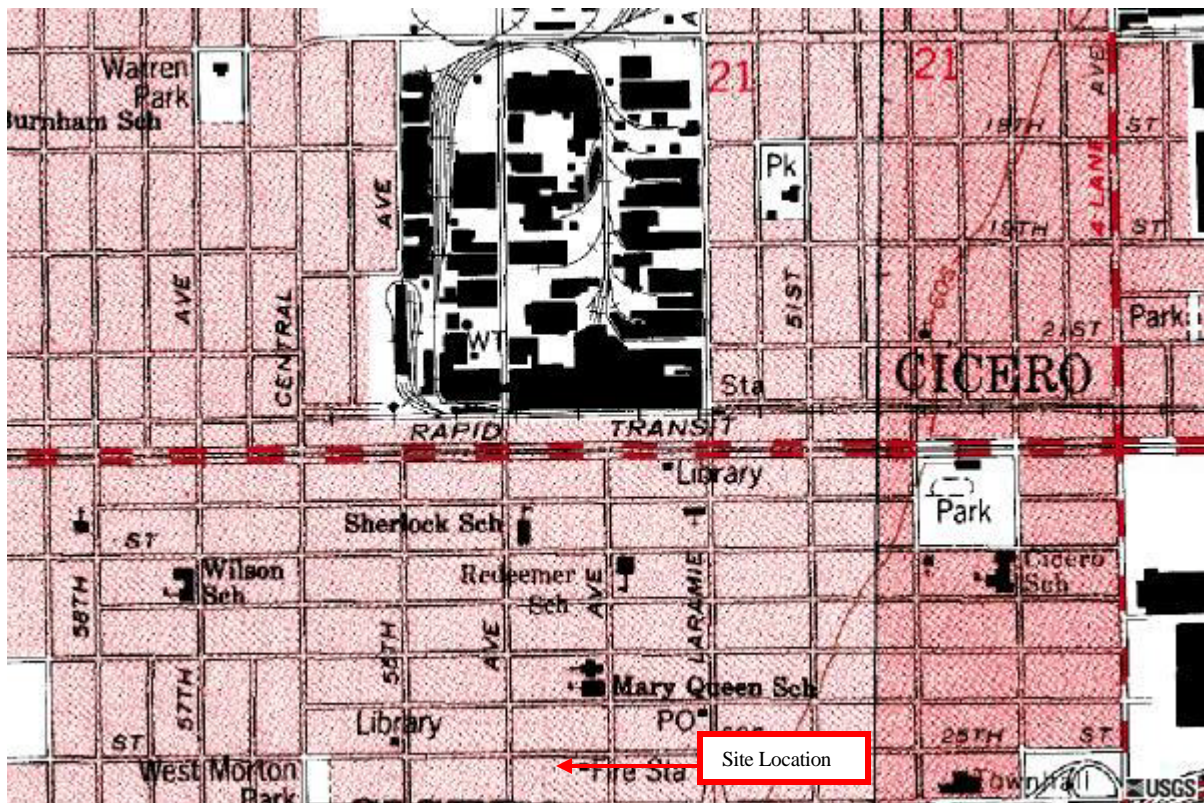

Figure 3 – Topographic Map (USGS, 1998)

2.6 Area Geology

In order to categorize and assess the geologic conditions encountered at the Subject Property, K-Plus consulted various sources of information including geological maps constructed by the Illinois State Geological Survey. Specific geologic maps used during this investigation include *Potential for Contamination of Shallow Aquifers by Land Burial of Municipal Wastes*; and *Potential for Contamination of Shallow Aquifers by Surface and Near-Surface Waste Disposal* by Berg, Richard C. et al (Berg Map) which were constructed to describe and map geologic materials to a depth of 50 feet throughout the state. In these maps, various geologic materials were differentiated by thickness, texture, permeability, and stratigraphic position in order to rate their relative contamination potential for aquifers in any area of the state.

According to the Berg Map, the regional geologic materials in the area are designated as type as an “E”-type soil (Figure 4). An “E” classification is described as uniform, relatively impermeable silty and clayey diamictos greater than 50 feet in thickness, with no evidence of interbedded sand and gravel.

Figure 4 – Berg Map

3.0 PRIOR REPORT

No report documents were available for the Subject Property.

4.0 OBSERVATIONS AND FINDINGS

The findings presented herein are based on all appropriate inquiry into current practices and previous ownership, uses and operations regarding the Subject Property consistent with good commercial and prudent engineering practices. The information obtained through the research and the site inspection is presented in the following sections. As appropriate, photographs and figures have been included for reference.

4.1 Prior Use History

Historical information gathered during this investigation indicates that the Subject Property has been occupied by the lamp manufacturing business since at least 1976.

K-Plus reviewed aerial photographs obtained through Environmental Data Resources, Inc. (EDR), and Google Earth. Aerial photos were found from the years 1951, 1972, 1983, 1988, 1994, 2005, and 2006. The 1951 aerial map depicts the Subject Property and the surrounding area as developed with industrial buildings and residential buildings surrounding. The subsequent aerial maps from 1972, 1983, 1988, 1994, 2005 and 2006 show the Subject Property and the development of the surrounding area with little changes to development.

K-Plus conducted a search of Sanborn Fire Insurance Maps through EDR. Sanborn for the Subject Property were reviewed for the following years; 1909, 1918, 1950, 1975, 1988, 1991, 1993, 2002 and 2004. According to the Sanborn map from 1909, the Subject Property was an undeveloped lot at that time. According to the Sanborn map from 1918, the Subject Property has been developed with a one story building labeled “Stores” and “Tire Vulcanizing”. In the northwest portion of the property a “500 Gal. Gasol. Tank Buried” is noted on the map. The 1950 Sanborn shows no changes to the building, however the use is not depicted and an addition to the south of the property includes a heater room, cleaning room and tumbler room. Additionally, some of the surrounding properties have changed from residential to stores or industrial/commercial use. According to the Sanborn map from 1975 the building has been added on to the east now and labeled “PressG” and “BLRRM”. Also the former “heater room” is now labeled “Laundry”. No changes to the building are noted on the subsequent Sanborn maps.

K-Plus also reviewed topographic maps for the years; 1901, 1953, 1963, 1972, 1980, 1993, and 1998. Individual buildings are not depicted on the maps for the Subject Property and the surrounding area.

K-Plus submitted a Freedom of Information Act (FOIA) request to the Town of Cicero concerning any historical information regarding the Subject Property. No additional information was provided by the building department.

According to the Cook County Assessor’s office, the buildings on the Subject Property date back to 1935 and 1956.

According to the historical information reviewed the Subject Property was developed sometime between 1909 and 1918 with “Stores” and “Tire Vulcanizing”. In the northwest portion of the property a “500-gallon gasoline tank buried” was present from at least 1918 to 1950. Between 1918 and 1950 the property was occupied by “H’T’R.R’M”, “Cleaning RM” and “Tumbler RM” indicating the property could have been used for dry cleaning processes. By 1975 an addition labeled “Press’G” and “B’L’RR’M” was built to the east of the onsite structure and the “H’T’R.R’M” was used as “Laundry”. The Subject Property has been occupied by “Azzolin Brothers Importers Ltd” from at least 1976 until present day.

The prior uses of this property are identified as RECs.

4.2 Facility Operations

In order to identify existing RECs associated with the Subject Property, K-Plus conducted a thorough on-site inspection. During the site inspection, K-Plus noted that the Subject Property, which appeared to be in fair condition, is currently unoccupied. It was most recently occupied by a decorative lamp manufacturer and retail space. The most recent use of the Subject Property is not identified as an REC.

4.3 Storage Tank Search

Efforts were made to determine the presence of any tanks used to store regulated substances at the Subject Property or at neighboring properties. Visual observations from the inspection were supported by checking state and local resources for information regarding tanks. During the investigation of the Subject Property, K-Plus identified evidence of USTs at the Subject Property. Two manways and associated fill pipes were observed in the room in the southeast corner of the building. A concrete patch approximately 2’ x 5.5’ in size and associated fill pipe to the southwest were noted in the room in the southeast corner of the building. Additionally on the southern exterior wall of the building, three suspect vent pipes and two suspect fill pipes were observed. According to the real estate representative for the property, the storage tanks have been emptied of contents and filled with a concrete/pea gravel slurry mix. However, the OSFM has no record of the tank abandonment or the tanks; therefore the abandonment of these tanks was not properly documented. Also, other than the verbal account, no reports were made available concerning the tank abandonment.

K-Plus submitted a FOIA request to the Town of Cicero concerning any historical information regarding storage tanks and hazardous material usage at the Subject Property. Additionally, K-Plus reviewed the Office of the Illinois State Fire Marshal (OSFM) database of registered USTs and the Illinois Environmental Protection Agency (IEPA) database of leaking UST (LUST) sites. As stated above according to these databases, the site is not registered with any underground storage tanks.

4.4 PCB Equipment Identification

The K-Plus inspector attempted to locate and identify all transformers or capacitors and, if present, to determine the age and owner of this equipment as well as its condition. During the inspection, K-Plus observed a dual-pole-mounted transformer near the southwest exterior corner of the building on the Subject Property. During the inspection of the transformer, the inspector noted that it appeared to be in good operating condition with no signs of leaking or staining evident on the pole or ground surrounding the unit. Finally, the unit was not marked with any black and yellow PCB warning stickers. A warning sticker is required by federal regulations for equipment containing between 50 and 500ppm PCBs or greater. ComEd, as the owner of the transformers, is responsible for keeping the equipment in compliance with federal, state, and local regulations and the cleanup of contamination resulting from leaking equipment, as necessary.

4.5 Environmental Database Evaluation Area

During this evaluation, K-Plus utilized Environmental Data Resources to conduct a standard environmental record search in accordance with the ASTM standards. The specific databases consulted, the publication dates, and the search results are included in a database report included as Appendix 5.

The EDR database report identified the following sites within the standard ASTM search radius: One (1) Comprehensive Environmental Response, Compensation and Liability Information System-No Further Remediation Action Planned (CERC-NFRAP) listing; five (5) Corrective Action Activity (CORRACTS) listings; one (1) Resource Conservation and Recovery Act-Large Quantity Generator (RCRA-LQG) listing; one (1) Resource Conservation and Recovery Act-Conditionally Exempt Small Quantity Generator (RCRA-CESQG) listing; one (1) State Hazardous Waste Sites (SHWS) listing; five (5) Category Listing (CAT) listings; seventeen (17) LUST listings; four (4) UST listings; one (1) Engineering Controls (ENG CONTROLS) listing; three

(3) Institutional Controls (INST CONTROLS) listings; and five (5) Site Remediation Program (SRP) sites.

The EDR database also identified seven sites that were orphaned sites. A reasonable attempt was made by K-Plus to locate the orphaned sites to ensure that they were not an adjoining or nearby property. The results indicated that these orphaned sites are not in close proximity to the Subject Property and are therefore not a concern.

4.5.1 Subject Property

The Subject Property is not identified on the environmental database.

4.5.2 Adjacent Properties

As part of this Phase I ESA, K-Plus conducted a limited drive-by investigation of the adjacent and nearby properties. A review of the environmental databases indicates that none of the adjoining neighboring properties appear on the environmental databases.

4.5.3 Surrounding Area Properties

Although some of the surrounding area properties are listed on the environmental databases, based on information obtained during this evaluation, the thick gray clay geology (which inhibits the migration of contaminants) in the area, and the likely direction of groundwater flow, it does not appear that any of the surrounding area properties would have impacted the Subject Property any more than other surrounding area properties.

5.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of 5333 W. 25th Street. Any exceptions to, or deletions from, the practice are described in Section 6.0 of this report. This assessment has identified the following RECs:

- The Subject Property has utilized Underground Storage Tanks based on Sanborn maps, OSFM reports and verbal history. As many as six USTs may be present at the property which may have stored solvents and/or fuel oil.
- The Subject Property has been utilized for industrial purposes since its development including its prior use for “tire vulcanizing” and “laundry”.

Further investigation of the Subject Property would be necessary in order to determine what, if any impact the current and historic industrial operations have had on the subsurface of the Subject Property.

6.0 DEVIATIONS

K-Plus has performed this Phase I ESA in conformance with the scope and limitations of ASTM Standard E 1527-05. This Report was prepared with the following limitations and exceptions:

1. No legal description was provided for this property. This data gap does not affect the ability of K-Plus to identify RECs at the property.
2. While the historical use of the property was identified in every decade from 1901 to present time, the historical use was not always identified in 5 year intervals as required by the ASTM standard. Historical record reviewed indicates that the Subject Property use and development is as described herein. This data gap does not affect the ability of K-Plus to identify RECs at the property.
3. A Freedom of Information Act request was made to the Building Department. No building records were received for this property from the Town of Cicero. This data gap does not affect the ability of K-Plus to identify RECs at the property.
4. K-Plus hereby affirms that the regulatory database search for this Phase I ESA is subject to the limitations of Environmental Data Resources Inc. (EDR).
5. K-Plus was not provided with an environmental lien records search. However, a review of all standard environmental database searches did not reveal any evidence of environmental issues or liens for the Subject Property. In addition, site contacts were unaware of any environmental liens against the Subject Property.
6. No 50 year Chain-of-Title was provided by the client for evaluation. This data gap does not affect the ability of K-Plus to identify RECs at the property.
7. K-Plus did not conduct interviews of past owners, operators or occupants. K-Plus was able to interview the current owner/occupant. This data gap does not affect the ability of K-Plus to identify RECs at the property.
8. Access to the rooftop was not provided. Therefore, K-Plus makes no guarantees as to equipment, which may be present on the roof. However, K-Plus Environmental did not observe rooftop equipment of environmental significance as viewed from the ground.

7.0 ADDITIONAL SERVICES

Per the request of the client, K-Plus Environmental evaluated the following non-scope considerations.

7.1 Asbestos

As part of a standard Phase I Assessment and in accordance with the *Guidance for Controlling Asbestos-Containing Materials in Buildings*, issued by the U.S. Environmental Protection Agency (USEPA) in 1985, K-Plus Environmental concentrated on identifying suspect materials sprayed or troweled on ceilings and walls; insulation on pipes, boilers, and other mechanical equipment; and miscellaneous materials such as ceiling and floor tiles. Inaccessible areas (those locations where inspection access is not permitted or requires a considerable amount of mechanical or structural disassembly) were not evaluated during this Phase I ESA. Inaccessible areas include, but are not limited to, pipe chases behind solid walls and ceilings, the interiors of machinery and equipment, and the interior of the building's water sewer system, which may contain transite piping.

Based on the age of the building, it is possible that asbestos containing materials (ACMs) are present in original building materials. During the site inspection, interior building materials noted as suspect for asbestos were 9-inch and 12-inch vinyl floor tiles, drywall joint compound, and baseboard mastic. Therefore, K-Plus recommends an asbestos survey be conducted to evaluate the presence and condition of any ACMs at the Subject Property.

7.2 Lead Paint

K-Plus performed a limited lead-based paint search of accessible areas in the interior of the buildings. In order to determine the presence of lead-based paint on the Subject Property, K-Plus inspected all reasonably accessible painted surfaces (i.e. walls, ceilings, door frames, window sills, etc.) for potential lead-based paint.

Based on the age of the building, it is possible that lead-based paint is present in the lower painted layers of the Subject Property. Since the Subject Property is not utilized for residential purposes, the existence of lead-based paint is not considered a significant concern for the Subject Property.

7.3 Radon

According to the USEPA Map of Radon Zones in Illinois (1993), Cook County, the county in which the Subject Property lies, has been designated as Zone 2, which is deemed as having a moderate potential for radon. According to the Map, Zone 2 has a predicted average screening level of 2 to 4 pCi/L. As a comparison, the USEPA recommends that the radon level be under a concentration of 4 pCi/L.

As the Subject Property is not currently being used for residential purposes, it is the opinion of K-Plus that radon is not currently an issue, and therefore no on-site radon testing was conducted.

7.4 Mold

K-Plus did not observe any obvious evidence of mold at the Subject Property, nor was there any visible evidence of significant water leaks or water damage that may lead to conditions in which mold thrives.

7.5 Other Non-Scope Considerations

During this evaluation, K-Plus noted that there are no high voltage power lines near the Subject Property. K-Plus also found that the Subject Property has not been identified as a culturally or historically protected land.

8.0 REFERENCES

1. Site Contact: K-Plus was accompanied by Mr. Ray Azzolin, the property owner, during the site inspection.
2. Aerial Photographs: An aerial photograph search was provided by Environmental Data Resources (EDR). Aerial photographs dated 1951, 1972, 1983, 1988, 1994, and 2005 were reviewed in conjunction with this investigation.
3. Sanborn Fire Insurance Maps: A Sanborn map search was conducted through Environmental Data Resources (EDR). Sanborn maps for the years; 1909, 1918, 1950, 1975, 1988, 1991, 1993, 2002 and 2004 were available for the Subject Property and surrounding area.
4. Topographic Maps: A topographic map search was provided by EDR for the USGS 7.5 Minute Series, Berwyn, Illinois Quadrangle. Maps were reviewed for the following years: 1901, 1953, 1963, 1972, 1980, 1993, and 1998.
5. City Directory Abstract: A City Directory search was provided by EDR. Haines Criss-Cross Directories were searched for the following years: 2008, 2000, 1995, 1990, 1986, and 1976.
6. Building Department Records: K-Plus requested building records from the Town of Cicero. Additionally, K-Plus spoke with representatives of the Building Department for Cook County regarding the Subject Property.
7. Storage Tank Search: K-Plus requested records regarding the presence of storage tanks from the Town of Cicero Fire Department. Additionally, K-Plus reviewed the Office of the Illinois State Fire Marshal (OSFM) database of registered USTs and the Illinois Environmental Protection Agency (IEPA) database of leaking UST (LUST) sites.
8. Township Assessor Office: K-Plus consulted with the Cook County Assessor's office to obtain current information regarding the building on the Subject Property.
9. Prior Reports: No prior reports were made available for K-Plus to review.
10. Environmental Database Report: K-Plus reviewed an environmental database radius map search report prepared by Environmental Data Resources (EDR) for the Subject Property and surrounding area.

9.0 CERTIFICATION

The Phase I ESA was completed by Ms. Jessica Madsen, Environmental Professional, and was reviewed by Mr. Daniel M. Caplice, P.E.. Professional profiles are provided in Appendix 6.

I declare that to the best of our professional knowledge and belief, I/we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. I/We have the specific qualifications based on education, training, and experience to assess the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Conformance with 40 CFR Part 312 was achieved through completion of the assessment in accordance with ASTM Standard Practice E 1527-05.

Jessica Madsen
Environmental Professional

Daniel M. Caplice, P.E.

APPENDIX 1

PHASE I ENVIRONMENTAL SITE ASSESSMENT CONTENTS

Area Geology

The potential for contaminating groundwater resources is a critical concern. Contamination may result from land burial of municipal wastes and surface or near-surface disposal of wastes (i.e. septic systems; surficial sludge; agricultural pesticides, herbicides and fertilizers; accidental spills of hazardous chemicals or petroleum products; etc.). When chemical or biological agents from wastes enter surface water or groundwater, they present potential health hazards. Groundwater aquifers are susceptible to contamination because their hydrogeologic properties provide a rapid transport pathway for migrating compounds. The degree of potential impact is determined by a combination of the geological and hydrological conditions in a given area.

Property Inspection

A visual inspection of the Subject Property was performed. The inspection consisted of a walk-through of the building and the surrounding grounds. During the walk-through of the building, an effort was made to look at all mechanical and common areas. During the inspection of the surrounding grounds, the inspector looked for stained or disturbed soil, signs of illegal or unauthorized dumping, and any improper or imprudent use, storage, and disposal of hazardous materials.

Storage Tank Search

The storage tank search is completed because studies have estimated that a quarter of the country's underground storage tanks (USTs) are leaking. While most leaks are small and don't present major environmental threats, larger leaks that result in groundwater contamination can require significant cleanup actions because several million of these USTs, as well as a large percentage of above ground storage tanks (ASTs) in the United States, contain petroleum or hazardous chemicals.

PCB Equipment Identification

Due to their physical and chemical properties, PCBs were widely used as a dielectric fluid in electrical transformers and capacitors. In addition to electrical equipment, PCBs were also widely used in hydraulic fluids and some lubricating oils. Although the primary concern with PCB contamination is from large electrical and mechanical equipment in heavily industrialized areas, small quantities of PCBs may also be present in any older equipment utilizing dielectric fluid or hydraulic oils.

In 1976, Congress enacted TSCA (Toxic Substance Control Act), which specifically regulates PCBs. In a 1986 USEPA report, it was estimated that, out of all the transformers currently in operation across the country, approximately 77,000 contain PCBs. Of these 77,000 transformers, about 18,000 are owned by utility companies with the remainder belonging to building owners.

Environmental Database Evaluation Area

K-Plus conducted a limited visual inspection of all adjoining properties in order to identify any RECs or other potential environmental issues that may pose a threat to the Subject Property. In addition, and as required by the ASTM Standard, regulatory databases, and when available, regulatory files, were reviewed during this assessment to determine whether the Subject Property

has been the subject of any environmental regulatory agency or order. Because the migration of chemicals is not limited to property lines, neighboring properties can in some cases impact the Property. For this reason, nearby properties were also evaluated to determine if any of these have had a history of environmental problems.

All sites located within the ASTM standard radius distances from the Subject Property are evaluated as part of the ESA. Any sites that are considered to be a potential environmental concern based on their operations, regulatory history, or proximity to the Subject Property are investigated more extensively. If a detailed discussion of a property listed in one of the environmental databases is not provided here, it is because K-Plus has determined, based on research and observations, that the property does not pose a significant environmental risk to the property being addressed in the Phase I Environmental Assessment.

Asbestos

Asbestos-Containing Material (ACM) gained widespread use because of its availability and unique properties as reinforcement material and an insulator. As a result, asbestos was commonly used in many building materials such as vinyl floor tile and mastic, ceiling tile, thermal insulation, and wall board. Eventually, however, medical research determined that prolonged exposure to asbestos was a potential cause of cancer and other lung diseases. Asbestos products manufacturing in the U.S. was banned under the Toxic Substances Control Act (TSCA) beginning in 1990.

Lead Paint

According to the National Lead Information Center, any residential structure built before 1978 may contain lead-based paint. Further, most residential buildings constructed prior to 1960 contain lead-based paint; and these older structures generally contain paint that contains higher concentrations of lead than paints manufactured in later years.

Lead is a heavy, gray metal that was historically added to house paints and other paints because it helped them dry faster. Lead-based paint was also preferred because it made a coating that stood up to wear and tear and weathering. Today lead is classified as a toxic substance and is known to cause adverse health effects in humans and the environment. In 1978 lead-based paint for residential use was banned by the Consumer Products Safety Commission. In the residential housing sector, the U.S. Department of Housing and Urban Development (HUD) estimates that there are about 57 million privately owned and occupied residential dwellings built before 1980 that contain lead-based paint. If in good condition and when left intact, lead-based paint by itself is not likely to present a hazard. However, deteriorating paint, particularly in residential situations, may pose a significant public health risk.

Radon

According to the United States Environmental Protection Agency Office of Radiation and Indoor Air, nearly 1 out of every 15 homes in the U.S. is estimated to have elevated radon levels. Radon is

a gas that results from the natural breakdown (radioactive decay) of uranium, and can be found in soils and rocks containing uranium, granite, shale, phosphate, and pitchblende. In addition, radon can be present in certain types of industrial wastes including byproducts from uranium or phosphate mining. In outdoor conditions, radon is diluted to very minor concentrations; however, inside of an enclosed space such as a basement, radon can accumulate causing adverse health affects including an increased risk of developing lung cancer.

In order to evaluate the risk of radon at a property, K-Plus first reviewed all applicable Federal and State radon studies. Specifically, for properties in Illinois, K-Plus reviewed a statewide radon screening conducted in 1990 by the Illinois Department of Nuclear Safety. K-Plus then considered the property use (i.e. residential, commercial, industrial, etc.) and the presence of any useable enclosed spaces (i.e. residential basements) to further determine the extent of risk. In instances where a property was considered a potential risk for radon, K-Plus conducted an on-site radon screening test.

Mold

K-Plus performed a limited mold search of accessible areas in the interior of any buildings. Often mold can negatively affect the health of the environment or humans and can go undetected in between wall spaces or dropped ceilings.

Vapor Intrusion

Vapor Intrusion is the migration of volatile chemicals from the subsurface into overlying buildings. Volatile chemicals in buried wastes and/or contaminated groundwater can emit vapors that may migrate through subsurface soils and into indoor air spaces of overlying buildings in ways similar to that of radon gas seeping into homes. Through any breaks in the foundation, such as for sump pumps, drains, or cracks, soil vapors can enter properties. Soil vapors accumulate over time in your building and can lead to indoor air pollution, which can have an affect on your health or the health of your employees.

The purpose of a vapor intrusion assessment is to identify, to the extent feasible, the potential for vapor intrusion conditions (pVIC) or vapor intrusion conditions (VIC). For this Phase I ESA, only the first tier of the evaluation process will be used to determine whether a pVIC exists.

Other Non-Scope Considerations

Other non-scope considerations such as the presence of high voltage power lines, wetlands, or culturally or historically significant lands may affect property value or the health of the environment or its inhabitants.

APPENDIX 2

GLOSSARY OF TERMS

ENVIRONMENTAL SERVICES

GLOSSARY OF TERMS

ACM – Asbestos Containing Material

ACBM – Asbestos Containing Building Material

Adjoining or adjacent property – any real property or properties the border of which is contiguous or partially contiguous with that of the *Subject Property*, or that would be contiguous or partially contiguous with that of the *Subject Property* but for a street, road or other public thoroughfare separating them.

All appropriate inquiry (AAI) – that inquiry into the previous ownership and uses of the *Subject Property* consistent with good commercial or customary practice.

ASTM – American Society of Testing Materials or ASTM International

AST – Aboveground Storage Tank

Business environmental risk – a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a Subject Property, not necessarily limited to those environmental issues required to be investigated by ASTM. Business environmental risks may involve addressing one or more non-scope considerations.

Contaminant source – the origin of the soil and groundwater contamination; may be a general property location (for example, a dry cleaner property address) or, if known, a specific location on a property (for example, the dumpster behind the dry cleaners where filters with perchloroethylene dry cleaning solvent were disposed).

Data gap – a lack of or inability to obtain information required by this practice despite good faith efforts by the *environmental professional* to gather such information. *Data gaps* may result from incompleteness in any of the activities required by ASTM, including but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory official, etc.).

EDR – Environmental Data Resources Inc., the supplier of the environmental radius map report.

Environmental professional – a person meeting the education, training, and experience requirements as set forth in ASTM Practice E 1527.

Fire insurance maps – or *Sanborn maps* are maps produced for private fire insurance map companies that indicate uses of properties at specific dates and that encompass the property. These maps are often available at local libraries, historical societies, private resellers or from the map companies who produced them.

FOIA – Freedom of Information Act request

Groundwater – the water contained in the pore spaces of saturated geologic media.

Hazardous materials/ substances – a substance defined by CERCLA.

Hazardous waste – a solid waste or combination of solid wastes, which because of its quantity, concentration or physical, chemical or infectious characteristics may (A) cause or significantly contribute to an increase in mortality or and increase in serious irreversible or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported or disposed of, or otherwise managed.

IEPA – Illinois Environmental Protection Agency

LUST – Leaking Underground Storage Tank

Non Scope factors -- ...Environmental issues or conditions at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of this [ASTM] practice.

Orphaned site – EDR uses the term “orphaned site” to reference a site that, due to incomplete geographic location data, are not plotted on the EDR radius maps.

PCB – Polychlorinated Biphenyl, environmental contaminant commonly found in power transformers.

Petroleum products – petroleum, including crude oil distillates of crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance; natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). Including but not limited to gasoline, kerosene, diesel oil, jet fuels, and fuel oil.

Phase I Environmental Site Assessment (ESA) – the process by which a person or entity seeks to determine if a particular parcel of real property is subject to *recognized environmental conditions* or as defined by ATSM 1527-05.

Pits, ponds or lagoons – man-made or natural depressions in a ground surface that are likely to hold liquids or sludge containing *hazardous substances* or *petroleum products*. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the *pit, pond or lagoon*, including, but not limited to discolored water, distressed vegetation, or the presence of an obvious wastewater discharge.

Publicly available – information that the source of the information allows access to the information by anyone upon request.

Potable water – water that is or can be used for consumption

Practically reviewable – information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis or irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the property is located are not generally *practically reviewable*.

Preferential pathway – the pathway that has the least amount of constraint on the migration of chemicals of concern.

REC -- As defined in ASTM E 1527-05, the term *Recognized Environmental Condition* means "...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property." In addition, the term *Historical Recognized Environmental Condition* means "...an environmental condition which in the past would have been an REC, but which may or may not be considered a REC currently." Performance of the Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the existence of Recognized Environmental Conditions in connection with the Subject Property.

Subject Property – The building or parcel on which the Phase I Environmental Site Assessment is the focus.

USEPA – United States Environmental Protection Agency

Underground Storage Tank (UST) – any tank, including underground piping connected to the tank, that is or has been used to contain *hazardous substances* or *petroleum products* and the volume of which is 10% or more beneath the surface of the ground.

Volatile organic compound (VOC) – a general term for an organic compound that has a high enough vapor pressure at standard temperatures and pressure to significantly vaporize and enter the atmosphere.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants..... EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>FORMER DANLY MACHINE CORPORATI</i>	<i>2100 SOUTH LARMIE AVENU</i>	<i>N 1/4 - 1/2 (0.471 mi.)</i>	<i>E32</i>	<i>42</i>

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/11/2009 has revealed that there are 5 CORRACTS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

BARRETT VARNISH COMPANY	1532 SOUTH 50TH COURT	NNE 1/2 - 1 (0.992 mi.)	42	97

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 01/13/2010 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WEST TOWN PLATING INC	5243 W 25TH PL	ESE 1/8 - 1/4 (0.169 mi.)	7	13

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 01/13/2010 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Illinois Environmental Protection Agency's Category List.

A review of the SHWS list, as provided by EDR, and dated 11/16/2009 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Illinois State Fire Marshal's STC Facility List.

A review of the UST list, as provided by EDR, and dated 02/01/2010 has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 01/13/2010 has revealed that there are 3 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 2 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

GRAN BROS	5522 26 DIV	SW 1/8 - 1/4 (0.227 mi.)	13	22

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there is 1 EDR Historical Cleaners site within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Biennial Reports:

Last Biennial Reporting Year: 2007

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility name: WESTERN ELECTRIC CO INC
Classification: Not a generator, verified

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F001

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F006

Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste code: F008

Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F009

Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: U013

Waste name: Not Defined

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Biennial Reports:

Last Biennial Reporting Year: 2007

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 205104.2

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 01/14/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 03/01/2010
Number of Days to Update: 56	Next Scheduled EDR Contact: 05/31/2010
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/30/2009	Source: EPA
Date Data Arrived at EDR: 08/11/2009	Telephone: 703-412-9810

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Most Recent Revision:	1997

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
COOK, IL

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
BERWYN

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
B5	1/4 - 1/2 Mile SSE	Not Reported
7	1/4 - 1/2 Mile ESE	Not Reported
8	1/2 - 1 Mile NNE	Not Reported
13	1/2 - 1 Mile West	N,NW
21	1/2 - 1 Mile WSW	NE

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Silurian
Series:	Middle Silurian (Niagoaran)
Code:	S2 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBANLAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
fine sandy loam
loam
fine sand

Surficial Soil Types: silt loam
fine sandy loam
loam
fine sand

Shallow Soil Types: sandy loam

Deeper Soil Types: silt loam
sand
loamy sand
loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX 6

QUALIFICATIONS OF PROJECT PERSONNEL

**SUMMARY OF EXPERIENCE**

Title: *Project Manager*

Years Experience: *±10 yrs.*

Education:

B.S., Environmental Health Sciences Degree, Illinois State University

OSHA 1910.120, 40 hour - HAZMAT training.

OSHA 8-hour refresher

IDPH: AHERA

Asbestos Building Inspector: IL

Illinois State University established its Environmental Health Sciences Program in 1974. Environmental Health Sciences courses at Illinois State University focus on the history and establishment of environmental laws, as well as the application of the laws in the field. The diversity of Mrs. Madsen's undergraduate degree has enabled her to develop strong analytical and research skills. Mrs. Madsen's ability to handle multiple tasks in team environment has greatly strengthened her time management and communication skills.

As a Project Manager for K-Plus Environmental, Mrs. Madsen has been responsible for conducting hundreds of project oversight and fieldwork activities, as well as environmental assessments and compliance audits on a broad range of properties, from industrial sites to multi-family residential properties, and writing technical reports to ensure compliance and conformance with environmental regulations and guidelines. Mrs. Madsen's effective management and organizational skills have enabled her to work on a variety of projects, including property assessments, subsurface soil and groundwater investigations, asbestos and lead paint surveys, site remediation projects and underground storage tank removals and abandonment. Mrs. Madsen's educational background, strong analytical, technical and communication skills, as well as her project management experience, allow her to efficiently and effectively communicate technical concepts and issues to a wide variety of constituents.

Selected Project Involvement

Spill Response Remediation and Restoration, Rancho Cordova, CA: Project Manager for the environmental remediation of a large tract of land contaminated by a spill of PCB-contaminated oil. Because the contamination was on private property not owned by the responsible party, the cleanup objective for the work was total removal of all contamination. Mrs. Madsen directed all onsite removal and restoration activities that were completed. All work was completed on an expedited schedule over a holiday weekend.

SRP Site Closure, Former Industrial Facility, Seneca, IL: Served as Resident Engineer to manage and direct the final phase of an environmental clean up of a former industrial site adjacent to Illinois River. Work involved the testing and removal of soil contaminated by pesticides, followed by site restoration. K-Plus worked under the supervision of the Illinois EPA during the clean-up effort.

SRP Site Closure, Industrial Facility, Skokie, IL: Leaking tanks identified at an adjacent parcel migrated off-site. An extensive subsurface investigation was completed to determine the horizontal and vertical extents of the soil and ground water contamination. During the investigation, secondary surficial soil contamination was identified on the site due to spillage or dumping from the former adhesives manufacturing operations. The site was closed following fate and transport modeling. The closure was achieved with minimal cost to the owner by utilizing land restrictions and an engineered barrier and without any

active remedial activities. Upon review, the IEPA issued a No Further Remediation (NFR) letter for the property.

Leaking Underground Storage Tank Program, Commercial Facility, Melrose Park, IL: During an environmental assessment of the property, it was determined that the prior use of the property was a gasoline station. Following a magnetometer survey that suggested tanks were still present at the property, Mrs. Madsen directed the removal and destruction of the tanks. During removal activities it was determined that one or more of the tanks had experienced a leak, therefore a LUST Incident number was obtained and all affected soils were removed from the property. The site was cleaned to Illinois residential property standards and the Illinois EPA issued a NFR letter with no restrictions.

Environmental and Erosion Control Manager: Mrs. Madsen worked with Walsh Construction on their North-South Tollway Expansion Project. Mrs. Madsen worked with the Illinois Tollway alongside numerous Agency representatives to organize and protect the sensitive wetland species, as well as, the Hine's Emerald Dragonfly (endangered), identified in the Des Plaines River Valley during the construction of the I-355 Bridge through Lemont, Illinois. The project included the design and implement of a Maintenance Plan, Environmental-Safety Discussion, Dust Control Plan, Pollution Control Plan, as well as, the implement of the Erosion Control Plan, which was prepared and approved by the IEPA, in coordination with the local Agencies.

National Marine. Wetland Monitoring and Ecological Assessment: This project was located on the Illinois River within a flood plain. The site contained forested and wetland areas and a variety of vegetation and wildlife. Mrs. Madsen, Project Scientist, was responsible for performing site characterization and water quality investigations and evaluations. Assisted with the natural resource assessments and monitoring. Performed soil, surface water and groundwater sampling. Completed draft reports for submittal to the USEPA under CERCLA.

Federal Agency Experience: Mrs. Madsen has worked on numerous Phase I Environmental Site Assessments for potential cellular tower sites located throughout the Midwest. As part of these projects Mrs. Madsen was required to complete full NEPA screens on these properties in order to receive a Finding of No Significant Impact (FONSI) letter from the FAA.

National Experience: Mrs. Madsen has traveled to other states in order to conduct Phase II Subsurface Investigations such as: New York, Michigan, Indiana and Texas. With the Subsurface Investigations in foreign states it is necessary to comply with the local state or USEPA regulations, especially when looking at the analysis of lab data. Mrs. Madsen has conducted the research behind the regulations, in order to learn acceptable chemical limits for the soils in each of these states, as well as completed detailed technical reports which meet those state regulations.

Title: President

Years Experience: 28

Education:

MM, Finance and Managerial Economics,
J.L. Kellogg Graduate School of Management,
Northwestern University

MPH, Industrial Hygiene and Safety Engineering, University of Illinois at Chicago

BS, Civil Engineering, University of Illinois

Professional Engineer:
IL, IN, IA, FL, KY, LA, MI, MN, MO, OH, NC, OH, PA, SC, TX, and WI

AHERA Building Inspector: IL and IN

LUST Site Assessor: WI and IN

OSHA 8-hour On-site Management & Supervisor Training

HM-126F Safe HazMat Transportation Training

Radon Detection Services

Corrective Actions for Ground Water Contamination

SUMMARY OF EXPERIENCE

Mr. Caplice is a licensed professional engineer in 16 states with 28 years of environmental engineering and consulting experience. He has served as a consulting environmental engineer for various private, public, and non-profit institutions and he worked in several different capacities for the United States Environmental Protection Agency. He has an in-depth understanding of local, state and federal regulations and has performed projects in accordance with CERCLA, RCRA, CWA/Oil Pollution Act, CAA, NCP, and TSCA requirements. His specialized areas of expertise are evaluation of contaminated properties, assessment of risk and endangerment, regulatory compliance and permitting, hazardous waste management, industrial processes, Brownfield development, water quality, and site management including investigation, remediation, construction management, and monitoring.

Currently, Mr. Caplice is President of the K-Plus Engineering, LLC an 18 year-old, full service, professional technical service company with offices in Illinois, Indiana, Wisconsin, North Carolina, South Carolina, and Colorado. As President, Mr. Caplice is responsible for managing and directing the company in addition to his ongoing work.

For the past 23 years, he has served as a consulting environmental engineer for numerous private, public, and non-profit institutions. His responsibilities have included designing and directing various projects, particularly voluntary cleanups of contaminated soil and ground water sites, underground storage tank remediations, and NPL evaluations, investigations, and cleanups. Mr. Caplice has worked extensively on the investigation and cleanup of numerous active and abandoned industrial facilities, landfills, and other waste sites. He has also served as the project manager or senior technical advisor on hundreds of Phase I and Phase II Environmental Assessments at a multitude of sites, from small, undeveloped parcels of property to multi-location industrial facilities. Finally, Mr. Caplice has served as a technical expert on numerous State and Federal cases pertaining to the investigation and cleanup of contaminated properties as well as industrial hygiene and safety related issues pertaining to the investigation and remediation of contaminated property.

Mr. Caplice also has experience in the regulatory analysis of projects for compliance with federal and state environmental regulations, guidance, protocols, and procedures. His environmental regulatory experience includes evaluating compliance of private party actions, reviewing and preparing comments on proposed environmental laws and administrative rules, reviewing site documents and preparing detailed comments, and serving as a technical expert in various environmental cases.
